

THE AGENTIC SHIFT

ORCHESTRATING MARKETING AT THE SPEED OF THOUGHT

MARKET INFLECTION: FROM GENERATIVE TO AGENTIC The industry is evolving from content generation to autonomous orchestration of marketing workflows, where AI agents coordinate actions.	ADDRESSING THE CORE PROBLEM: OPERATIONAL BOTTLENECKS The content explosion has overwhelmed traditional marketing operations; Gradial solves this by streamlining governance, deployment, and optimization.	GRADIAL’S SOLUTION: THE INTELLIGENT LAYER Gradial's Intelligent Layer acts as sophisticated middleware, bridging strategic intent with enterprise systems for agility, accuracy, and compliance.	
\$55M TOTAL FUNDING Achieved \$55M, including a \$35M Series B led by VMG Partners.	\$350M POST-MONEY VALUATION Reflects strong investor confidence and market potential.	30X YOY REVENUE GROWTH Driven by Fortune 500 adoption, including AWS, T-Mobile, and Prudential.	20X EFFICIENCY GAINS Proven operational efficiency, coupled with 99.9% accuracy in content operations.

GRADIAL DEMAND GEN ROADMAP

DRIVING EFFICIENCY AND GROWTH

FINANCIAL CONTEXT

Secured a significant **\$35M Series B** round, totaling **\$55M** in funding, to fuel ambitious growth and expand market presence.

THE MANDATE

Our primary objective is to build a **predictable, scalable revenue engine** to penetrate and capture the Fortune 500 market.

OPERATIONAL SHIFT

We are shifting from **"Ad-Hoc Campaigns"** to **"Agentic Marketing Operations,"** embracing automation and data-driven decisions.

ESTABLISH DATA INTEGRITY & THE "SYSTEM OF TRUTH"

Θ1

Q1: JAN-MAR: FOUNDATION & HYGIENE

The quarter's primary focus is auditing and optimizing our HubSpot/SFDC sync for seamless data flow and consistency. We will define our Ideal Customer Profile (ICP) with precision and execute a rapid follow-up for NRF 2026 leads.

Θ3

FIELD MAPPING & STANDARDIZATION

Standardize technographic fields across all systems to identify key technologies like Adobe Experience Manager (AEM) or Sitecore. This will increase lead qualification accuracy by highlighting high-probability triggers.

Θ5

VALIDATION & LEAD QUALITY

Implement validation rules to block generic email domains on all demo request forms. This will maintain high lead quality, focusing our sales team on legitimate corporate buyers.

Θ2

STRATEGIC DATA ALIGNMENT

This foundational work aligns with our NRF 2026 presence and builds momentum toward the Q4 enterprise buying season. Accurate data will maximize ROI on marketing spend.

Θ4

AUTOMATED DATA ENRICHMENT

Integrate Lusha for automated enrichment of inbound leads, instantly appending critical data points like revenue and tech stack. This ensures an effective lead scoring model, preventing missed opportunities.

Θ6

EVENT WORKFLOW: NRF "FAST FOLLOW"

A "Fast Follow" workflow will be implemented for NRF booth scans, syncing leads to HubSpot and enrolling them in a Meeting Request sequence within 60 minutes. This rapid response improves conversion rates from event engagement.

COMPETITIVE LANDSCAPE

THREAT OF NEW ENTRANTS: MODERATE

Gradial has a significant "Integration Moat" due to deep engineering expertise required to connect with diverse legacy enterprise systems. Our established integrations create a formidable barrier to entry for potential competitors.

BARGAINING POWER OF BUYERS: HIGH

Enterprise clients demand bespoke security and customized integrations. Gradial's "Forward Deployed Engineering" model addresses this by embedding engineers within client organizations, fostering deep partnerships and trust.

THREAT OF SUBSTITUTES: HIGH (LABOR)

Low-cost BPO labor or junior agency staff are primary substitutes for Gradial's automation. However, Gradial's agents offer superior accuracy and unparalleled speed, making human substitutes economically unviable for high-volume operations.

RIVALRY: HIGH

Generative AI platforms like Writer and Jasper focus on content creation. Gradial differentiates through "Agentic Orchestration," performing actual work within marketing workflows and automating complex processes beyond content generation.

THE ENTERPRISE ACCOUNT

- **Revenue:** >\$1B annual revenue (Fortune 1000)
- **Tech Signals:** Adobe (AEM), Jira, Sitecore, AWS
- The "Agentic" Content Supply Chain

"DOGFOODING" OPERATIONS: PRACTICING WHAT WE PREACH

We will use Gradiant's **Automate** product internally to manage our own campaign assets. The immediate goal is to reduce internal landing page creation from 5 days down to 2 hours. This demonstrates Gradiant's efficiency and validates our "Scale" value proposition to both investors and customers.

CAMPAIGN FOCUS: PARTNER ECOSYSTEM EXPANSION

A critical focus for our Q1 campaigns will be leveraging our strategic partner ecosystem. We will launch a dedicated "**Migration Accelerator**" campaign targeting existing **Sitecore** customers. Powered by Gradiant, this initiative will showcase how our platform seamlessly facilitates their transition to cloud-based solutions. **Sectors:** Regulated industries (Finance, Telecom, Healthcare)

THE BUYING COMMITTEE (PERSONAS)

ECONOMIC BUYER: CMO / VP DIGITAL

Pain: Slow time-to-market.

Hook: "Reduce launch time from weeks to minutes."

TECHNICAL EVALUATOR: CIO / VP SECURITY

Pain: AI Compliance, SOC-2.

Hook: "Gradiant's *Govern* module ensures compliance."

OPERATIONAL USER: DIR. MARKETING OPS

Pain: JIRA ticket backlog.

Hook: "Automate busywork, streamline workflows."

MOVING FROM "DEMOGRAPHIC" TO "BEHAVIORAL" SCORING

THE MATRIX MODEL: FIT & ENGAGEMENT

FIT SCORE (A-D)

This score, based on firmographic data from Lusha, quantifies how well a lead matches our Ideal Customer Profile.

ENGAGEMENT SCORE (1-100)

This score measures a lead's behavioral intent, assigning points for key actions like visiting high-intent pages or a detected job change.

ORCHESTRATING THE "WHALE HUNT"

HUBSPOT + LINKEDIN SALES NAVIGATOR

We will sync "Target Account" lists from HubSpot into LinkedIn Sales Navigator, empowering sales with insights and direct access to decision-makers.

AUTOMATED ORCHESTRATION

When a target account visits our website, an automated workflow will trigger, adding their Buying Committee to a targeted LinkedIn "Brand Awareness" ad campaign.

CONTEXTUALIZED SIGNALS & WORKFLOWS

We will differentiate our response based on traffic context (e.g., existing customer vs. prospect), tailoring automated workflows to maximize conversion potential for upsell or conquest opportunities.
