

SHIVAM SINGH

MARKETING OPERATIONS & REVOPS | CRM / CDP | ATTRIBUTION | LEAD SCORING, ROUTING & DATA GOVERNANCE

San Francisco, CA | shiv-mkt-ops@umich.edu | +1 (202) 630-3211 | [linkedin.com/in/beastofbayarea](https://www.linkedin.com/in/beastofbayarea)

EXECUTIVE SUMMARY

Marketing operations and revenue operations leader with 10+ years building **MarTech** systems, **CRM/CDP** integrations, **lifecycle** data **pipelines**, **attribution**, **lead scoring** and executive reporting. Connects marketing, sales, data engineering and compliance through reliable operating rhythms, measurable funnel analytics and governed **first-party data**. Brings **CRM/CDP** architecture, **marketing automation**, **pipeline** operations, **attribution**, **data quality**, **BI** and **GTM governance** from anonymous demand through revenue reporting.

EDUCATION

University of Michigan, Stephen M. Ross School of Business - MBA, Data Analytics & Revenue Operations | 2022 - 2024

London School of Economics and Political Science - Executive Coursework, Economics, Markets & Public Policy | 2024

Indian Institute of Technology - B.Tech, Computer Science & Engineering | 2010 - 2014

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) - Marketing Technology

2024 - Present | San Francisco, CA

Senior Marketing Operations Lead - CRM/CDP, Attribution & AI Automation

- Owned the customer data and **MarTech** architecture linking **15+** first-party sources into a Zero-ETL identity layer with schema contracts and lineage; consolidated **40+** fragmented sources and cut data latency **26** hours to **<15** minutes at four-nines reliability.
- Built an AI/ML **lead-scoring** and **routing** product using behavioral features, champion/challenger evaluation, PSI drift monitoring and auto-retraining; generated **+\$25M** incremental Q4 revenue, reduced CAC **20%** and increased conversion **1.8% to 5.4%**.
- Automated cross-functional reporting with AI Ops / intelligent document processing, reducing reporting latency **27%** while improving launch speed and **data quality** for leadership dashboards.
- Centralized SOPs, planning cadences, tracking standards and **data governance** across marketing and engineering teams, maintaining cross-channel measurement integrity and GDPR/cross-border compliance.
- Owned the marketing technology stack end-to-end - automation platform, first-party data **pipelines** and **CRM** / engineering integration - defining data contracts, system ownership and reliability from anonymous engagement through sales handoff.
- Built high-volume data-quality and QA monitoring to surface ingestion bottlenecks and protect executive-dashboard reliability, adding operational controls around stack health, lineage, deliverability and measurement consistency.
- Applied **SQL**, **marketing automation**, **metadata** management, data contracts and audit-log controls across first-party **pipelines** to strengthen lead **lifecycle** governance, data lineage, deliverability and **attribution** from anonymous demand through sales handoff.

Rakuten Group, Inc.

2023 | Tokyo, Japan

Revenue Operations & Marketing Analytics - MBA Intern

- Architected a unified **RevOps** intake and workflow engine across sales, marketing and operations, centralizing handoffs and reducing manual bottlenecks across a platform serving **70+** business units and **50,000+** merchants.
- Integrated customer data with predictive lead scoring, **routing** logic and **metadata** schemas, then built Power BI / QlikSense dashboards translating cross-channel performance into **attribution**, **pipeline** and ROI narratives for leadership.
- Identified a cross-device **attribution** gap and coordinated engineering, analytics, finance and merchant teams to restore transaction continuity, accurate revenue **attribution** and decision-grade reporting.
- Standardized **RevOps** intake, lead-routing, **pipeline**-stage and campaign **metadata** across GTM teams, combining predictive scoring with governed schemas so Sales, Marketing and Operations worked from consistent **lifecycle** definitions and handoff logic.
- Built leadership-ready Power BI / QlikSense reporting for channel performance, **pipeline** and ROI, standardizing source / medium taxonomy, campaign **metadata**, **lifecycle** stages and **attribution** definitions so GTM teams operated from consistent revenue reporting.

Microsoft Corporation - Data Governance

2020 - 2022 | Redmond, WA

Marketing Operations Lead

- Built a cross-border first-party data framework across **10** markets covering GDPR/Schrems II, PIPL and SEC **17a-4**; helped rescue a **\$5M** at-risk contract, win a **\$2M** upsell and avert **\$25M** in regulatory fine exposure.
- Managed tracking accuracy across large product catalogs and multi-category commerce surfaces, implementing automated cross-platform data mapping, **metadata** synchronization and compliance-by-design controls.
- Led change management across digital tools, campaign launch processes and vendor systems, aligning marketing, product and legal teams on **data quality**, ownership and scalable operating standards.
- Governed multi-region first-party data under GDPR / cross-border requirements, standardizing tracking, **metadata** synchronization and data-quality controls across large commerce catalogs to protect **CRM** accuracy, consent compliance and reporting integrity.

The D. E. Shaw Group - Marketing Infrastructure

2016 - 2020 | New York, NY & Hyderabad, India

RevOps Analytics Lead

- Operated an automated **ABM**, **lead-scoring** and **lifecycle** handoff network supporting **247,384** users and **\$34.6M** in linked transaction assets, connecting engagement signals to institutional outreach and conversion.
- Built behavioral telemetry and predictive churn monitoring to surface customer-health risk, preserve recurring revenue and feed **attribution** and performance reviews for senior stakeholders.
- Created a unified deal-data repository that cut consolidation **48** to **6** hours, improving **data quality**, handoff speed and executive visibility across investment, legal and commercial workflows.
- Deployed HubSpot, Apollo and Clay across an institutional **ABM** motion, using automation, enrichment, lead scoring, **routing** and channel-performance analytics to move prospects from outbound engagement through measurable conversion.

McKinsey & Company - Enterprise BI

2014 - 2016 | London, UK

Business Analyst, Marketing Analytics

- Re-engineered enterprise data velocity and quality-assurance reporting, automating manual tracking from hours to minutes and improving decision latency across fragmented technology and vendor environments.
- Designed BI visualization layers and analytics environments that standardized executive reporting, KPI definitions and cross-functional performance reviews.
- Defined common KPI, data-quality and executive-reporting standards across fragmented enterprise systems, giving cross-functional leaders a consistent operating view of performance, exceptions and remediation priorities.
- Designed BI visualization and data-quality layers across fragmented enterprise **pipelines**, automating manual reporting from hours to minutes and establishing common KPI definitions, exception monitoring and leadership-ready performance dashboards.
